GDIT

GDIT serves the mission by ensuring today is secure and tomorrow is smarter.

Who we serve

We are GDIT. The people supporting and securing some of the most complex projects across the country.

- Defense
- Health
- Federal Civilian
- Intelligence Community
- State
- National Security

Technology transformations that make a difference

We are there. On the ground, beside our clients, in the lab, and everywhere in between, offering the technology transformations, strategy and mission services needed to get the job done.

- AI
- Cloud
- Cyber
- Data & Analytics
- Enterprise IT
- Emerging Technology
- Enterprise Business Services

Accelerate the power of modernization.

We depend on IT every day to connect – not only to our data and information, but more importantly, to each other. This requires technology and practices that are constantly evolving to overcome changing demands and missions.

GDIT accelerates the modernization of legacy environments and deploys advanced digital ecosystems. We automate routine processes and incorporate managed and shared services to increase cost savings and efficiency. From networks to data centers and high-performance computing, we modernize the entire IT enterprise to power agency missions.

By transforming digital enterprises, our solutions advance cloud, cyber and artificial intelligence, while performing for the present and rapidly responding to the future.

GDIT

Our approach

IT INFRASTRUCTURE

With a range of capabilities, our IT infrastructure solutions provide full lifecycle management and modernization of enterprise environments including: software-defined networking, telecommunications, disaster recovery, compute, data center modernization and financial analysis.

ENTERPRISE SERVICE MANAGEMENT

Our approach to enterprise service management takes an enterprise view of service performance for seamless visibility across enterprises with a focus on improved user experience and productivity. We align to the user and agency mission with integration techniques, automation and self-healing capabilities.

WORKFORCE PRODUCTIVITY

Users require high performing access to agency systems, anywhere, anytime, from multiple devices. We deliver solutions for our customers so they can access services they need, including mobile and unified communications, collaboration tools, service desk/help desk support, Internet of Things and edge computing.

MANAGED SERVICES

We're empowering agencies with outcome-based managed services, providing them cost efficiencies and innovation. Our flexible models are delivered at scale to meet evolving needs of agencies, from service desk and hosting to security operations centers and cyber services.

AUTOMATION

We're incorporating automation and robotic process automation (RPA) everywhere it makes sense for agencies to reduce repetitive and mundane tasks and improve productivity. From identification and creation to execution, our automation expertise and solutions enable agencies and users to focus on their mission.

GDIT

Expanding the reach of intelligence.

Every day, government agencies face big questions. How can we use smarter technology to protect warfighters? How can we identify fraud at scale? How can we turn data into actionable intelligence?

Big questions take big thinking, from both humans and machines. From improving national security and advancing cyber, to monitoring data integrity, GDIT turns important questions into intelligent action.

We apply AI that agencies can trust to automate, secure and enhance their operations. Our people unlock the power of data and bring technologies to improve the now and shape what AI can do in the future.

We push AI further, expanding human capacity to make better decisions and implement smarter actions, faster. GDIT AI makes what was once impossible, possible.

GDIT

Delivering the art of the possible.

INTELLIGENT AUTOMATION + ROBOTIC PROCESSING AUTOMATION (RPA)

- Applying AI that agencies can trust to automate, secure and enhance their operations—from the day-to-day to highly complex initiatives.

MACHINE LEARNING (ML) + DEEP LEARNING

- Using text analytics and machine learning solutions to help intelligence analysts, detect fraud, assess climate change impacts and protect warfighters.

COMPUTER VISION

- Leveraging pre-trained detection networks to identify images, reverse image search, identify and generate deep fakes and video indexing.

DATA MANAGEMENT

- Analyzing, integrating and storing data with proven management architectures and solutions for over 20 years.

BIG DATA

- Helping clients manage large volumes of data to identify critical information and turn it into actionable intelligence.

NATURAL LANGUAGE PROCESSING (NLP)

- Delivering a suite of AI-based text and identity analytics products to manage large volumes of data to discover critical information. For over 20 years, GDIT has combined NLP with ML to achieve industry-leading accuracy and scalability that evolves with our clients' mission.

CLOUD | FACT SHEET

Cloud transformations made clear.

HOW WE APPROACH CLOUD

Working in the cloud should be an empowering experience, not an obstacle to overcome. As agencies continue to modernize, they need a partner who understands and takes on the complexities of the cloud. One who can apply that understanding and unleash the power of the cloud to improve mission success.

GDIT is that partner. We translate the language of the cloud into the language of the mission. We offer our customers the power of choice through a vast cloud ecosystem. At the same time, we apply our deep knowledge of their mission objectives to deliver the right cloud solution for them. Our transparent approach increases agency productivity, heightens security and strengthens performance.

GDIT delivers clarity. From strategy to security, migration to maintenance, we ensure cloud is a solution, not a complication.
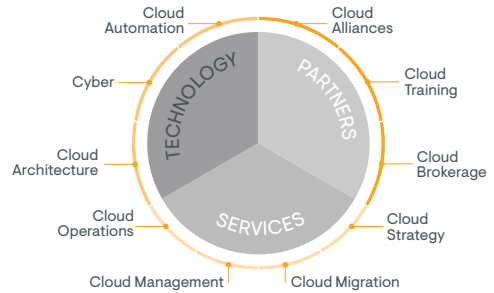

GDIT

Our approach

TECHNOLOGY

We design systems that deliver increased speed, savings and security. From FISMA and FedRAMP to the Department of Defense Impact Levels, we have the experience our customers require.

SERVICES

We work with our customers to determine the optimal cloud model best suited for their immediate needs and for their long-term cloud operations. Our partnership approach helps agencies to better anticipate requirements, streamline costs and incorporate best-practice maintenance services.

PARTNERS

We offer our customers the power of choice through a vast cloud ecosystem of cloud service providers and cloud partners. Our more than 50 cloud alliances include emerging companies to bring the latest technologies to overcome our customers' biggest challenges.

GDIT

CYBER | FACT SHEET

Secure today.
Smarter tomorrow.

Cyber impacts every aspect of our lives. That's why GDIT is driven to ensure clients have cyber protection today, while outthinking the threats of tomorrow.

We secure today, embedding resilient cyber solutions into every aspect of the mission – from fortifying our nation's critical infrastructure to securing the tactical edge. And we prepare for tomorrow, deploying new technology and partnerships to anticipate and preempt future risks. Our cyber experts enable agencies to evolve with confidence, accuracy and resiliency.

We do all of this because we know cyber is not a singular part of the mission—it's the thread that runs across every endpoint, every network and every person. By proactively protecting, instantly responding and constantly evolving, GDIT makes today secure and tomorrow smarter.

GDIT

Our approach

TALENT

In addressing the growing cyber threat, the most powerful weapon is talent. At GDIT, we have more than 3,000 cyber professionals, decorated with over 6,400 certifications. Our Cyber Center of Excellence is constantly working to prepare our workforce for the latest threats, using the latest capabilities.

PARTNERS

We understand that collaboration and knowledge-sharing are fundamental in building tomorrow's strongest lines of cyber defense. That's why we have more than 30 cyber alliances with some of the greatest thinkers, leaders and emerging technology companies to address our customers' biggest challenges.

SERVICES

Our cyber services implement next-gen cyber technologies and approaches across all programs and proposals. We also provide expert technical cyber domain support and enable teams to take advantage of our Cyber Center of Excellence ecosystem and Cyber Technology Alliances.

TECHNOLOGY

The GDIT Cyber Stack is a comprehensive modular ecosystem of cybersecurity capabilities that map to the Secure Cloud Computing Architecture (SCCA). The ecosystem provides network security, endpoint security, security event analysis, credentials management, incident response ready, security assessment and threat intelligence.
